MEMORANDUM FOR: Chairman, Deployment Working Group, GMAIC

SUBJECT: Search of 25 ICBM Complexes

REFERENCE: GMAIC Requirement 3-66
(NPIC Project 11026-6)

1. This memorandum is in response to your requirement which requests a search of the 25 identified ICBM complexes for additional deployment of single silos and/or soft sites.

2. The results of this search appear in the alphabetical listing of complexes which follows, showing mission and date of last complete coverage, mission and date of subsequent partial coverage and number of suspect areas with date of first appearance.

Some missions and dates included under "Subsequent Partial Coverage" do not appear on the accompanying overlays. Only significant blocks of good quality, clear photography were used to negate the 25 nm radius search area for new sites or suspects. "Subsequent partial coverage" includes the above photography plus photography of any quality sufficient to add new sites or suspects. First appearance dates represent photography of any quality or condition on which suspect areas can first be identified. Suspect areas which have been dropped are not listed.
